

CLINICAL TRIAL PROTOCOL

Protocol ID: TEST-ONC-001

Title: Phase 2 Study of Targeted Kinase Inhibitor in Advanced Solid Tumors

Inclusion Criteria:

1. Age 18 years or older at the time of signing informed consent.
2. Histologically confirmed advanced solid tumor refractory to standard therapy.
3. ECOG performance status 0 or 1.
4. Adequate renal function: eGFR must be at least 30 mL/min/1.73m².

Exclusion Criteria:

1. Active serious infection requiring systemic intravenous antibiotic therapy.
2. Recent myocardial infarction within 6 months prior to study enrollment.
3. Concurrent participation in another investigational interventional study.

Study Parameters:

Patients must agree to undergo baseline tumor biopsy.
